Jidhin Raju
Lead Software Engineer
tr.jidhin@gmail.com | Poland | LinkedIn

Principal-level Software Engineer with over 13 years of experience architecting and delivering highly scalable, secure distributed systems for the global financial services industry. Proven track record as a Technical Lead for over 5 years, directing cross-functional teams of developers and QAs to take complex enterprise applications from Proof-of-Concept to global launch. Currently **holding a Polish EU Blue Card with mobility rights**, seeking to leverage my experience in mentoring high-performing teams and driving engineering excellence with my expertise in the Azure, .NET, and C# ecosystems , with a focus on elevating team performance, mentoring, and fostering a culture of engineering excellence within agile frameworks.

Work Experiences

Vente-Privee, **(e-commerce) Poland | Lead Developer | October 2025 - Present**

- Lead teams for Payment, Procurement, and **E-invoicing for France & Belgium** connect to SAP
- Re-engineer functional F# programming library to object-oriented framework C# & PoC.
- Manage releases & Jira board to prioritize and align with business partners on technical roadmap.
- Define OKR, drive 1:1 & retros with team, resource allocation, Improving monitoring & observability.
- Enhance deployment pipeline, Db migration and manage hiring process to scale the legacy codebase.

GlobalLogic , Poland | Lead Software Engineer | January 2023 – September 2025

- Translated epics and features into actionable tasks, boosting sprint goal completion rates by 20%.
- Guided the technical design and greenfield development of a new backend service, taking it from Proof-of-Concept to an enterprise-level application for energy domain client (*Hitachi Energy*)
- Led team of QA & Developers, streamlining cross-team collaboration to enhance project delivery timelines by 11%.& achieving over 85% code quality.
- Conducted technical interviews, onboarding over 4 high-performing engineers, conducting demo to stakeholders, mentored developers to accelerate key areas of project development.

Credit Suisse, Poland | Senior Software Developer | February 2020 – December 2022

- Boosted computational efficiency by 30% read/write for trading desks by re-architecting & CQRS implementation on distributed backend systems for treasury operations.
- Migrated monolithic applications to microservices architecture, reducing system downtimes and scaling resources seamlessly using inhouse Kubernetes.
- Automated CICD pipelines, reducing deployment times by 50% on staging and integration environments while ensuring robust test coverage on artifacts.
- Collaborated with global teams to deliver critical components ahead of schedule, contributing to a better SLA adherence rate.

GBG Plc , Türkiye | Tech Lead & Senior Software Engineer | January 2018 – January 2020

- Led a team of 7 developers in creating cutting-edge applications featuring advanced image processing and face-detection algorithms, achieving a 20% increase in processing accuracy.
- Defined technical objectives, provided mentorship, preparing know how tutorials and training to new hires, virtual cross-teams, reducing onboarding dependency that boost team productivity.
- Directed end-to-end requirement analysis, project planning, assessments and architectural reviews and execution in collaboration with QA, PM, and development teams.

STC, Kuwait | Software Engineer , Tech Lead | August 2013 – December 2017

- Directed the integration of payment gateway APIs, digital wallet into Android, KIOSK & Windows-Embedded devices to facilitate utility bill payments.
- Implemented a WhatsApp-inspired mass campaign and user referral model, resulting in a 15% increase in user engagement through new SEO-optimized web and mobile app.
- Led incident management for production and staging environments, reducing issue resolution times.
- Allocate budget and successfully delivered over 8 high-impact projects within budget and timeline constraints.
- Delegated as IT Manager (In-charge) to manage technical roadmaps, mentored 3 Senior and 2 Junior engineers, enabling 3 promotions within the team over 18 months.

Skills and Personal Expertise

Programming Languages & Database

- C#,F#, .NET Core, .Net 9, ASP.NET, JavaScript, Blazor, Xamarin, Java, nUnit, xUnit, WebApp & WebAPI
- Oracle, SQL Server, PostgreSQL, MySQL, SQLite, NoSQL, Redis, MongoDB, Cassandra, RabbitMQ

Cloud, DevOps & Monitoring Tools

- Azure (Azure Functions, DevOps, IaaS, PaaS, Containers), Kubernetes, Docker, SharePoint, Ansible
- 'CI/CD' Pipelines, DevOps, Jenkins, GitHub Actions, GitLab, Bitbucket, TeamCity, PowerShell
- K6, Grafana, Prometheus, ELK Stack, Splunk, Argo CD, JMeter, Sonar, APM, JIRA & Confluence

Architecture & Software Development Practices

- Microservices, Distributed system, RESTful APIs, SOAP, MVVM, WPF, WCF, MVC, CQRS, Saga Pattern
- Event-Driven Architecture, Test-Driven Development (TDD), Behaviour-Driven Development (BDD)
- Peer Code Reviews, Integration Testing, Unit Testing , documentation and demonstrations
- OWIN, OpenID Authentications, API Gateway, Agile, Scrum, Kanban, JIRA & Confluence
- Data Structures & Algorithms, System Design, Architectural Patterns

Education, Certifications

- Bachelor of Computer Science
- Certified Android Developer
- GitHub Copilot, Gen AI practice
- Microsoft Azure Cloud (*AZ-204, on-going*)
- IoT powered home automation (*Raspberry PI*)
- *Go, Python, C++, Angular* (*Learn & DIY Project)*

Interests & Hobby

- Skygazing & singletrack rides - MTB
- Automate home with Raspberry-PI, IoT & Alexa

Career Achievements

- Best Employee VOS award for outstanding contributions to business success, exceptional onboarding process, and enhancing team productivity.

Availability & Work Permit

- Visa support : EU Blue Card holder with long-term mobility rights *(NIEBIESKA KARTA UE; DOSTEP DO RYNKU PRACY*)
