Jidhin Raju
Lead Software Engineer
tr.jidhin@gmail.com | 502820040 | Poland | LinkedIn

Principal-level Backend Engineer with over 12 years of experience architecting and delivering highly scalable, secure distributed systems for the global financial services industry. Expert in the Azure, .NET, and C# ecosystems with a proven record of leading technical design from concept to launch for enterprise applications serving thousands of users. A dedicated technical mentor focused on elevating team performance and fostering a culture of engineering excellence.

Work Experiences

HitachiEnergy (GlobalLogic) | Lead Software Engineer | January 2023 – September 2025

- Leading a team of engineers and QA professionals, streamlining cross-team collaboration to enhance project delivery timelines by 11%.
- Independently guided the technical design and greenfield development of a new backend service architecture, taking it from concept to a scalable Proof-of-Concept for an enterprise-level application designed to serve thousands of concurrent users.
- Translated epics and features into actionable tasks, boosting sprint goal completion rates by 20%.
- Remained 80% hands-on, personally designing and coding inter-service communications using WCF, REST APIs and RabbitMQ, improving data exchange reliability and consistency.
- Conducted technical interviews, onboarding over 10 high-performing engineers, conducting demo to stakeholders, mentoring junior developers to accelerate key areas of project development.

Credit Suisse | Senior Software Developer | February 2020 – December 2022

- Engineered and scaled distributed backend systems for high-traffic trading desk and treasury operations, improving computational efficiency by over 30% to support large-scale data processing.
- Migrated monolithic applications to microservices architecture, reducing system downtimes and scaling resources seamlessly using inhouse Kubernetes.
- Automated CI/CD pipelines, reducing deployment times by 50% on staging and QA environments while ensuring robust test coverage on artifacts.
- Championed best practices, including code reviews, comprehensive documentation, and integration testing, achieving over 85% code quality score.
- Collaborated with global teams to deliver critical components ahead of schedule, contributing to a better SLA adherence rate.

GBG Plc | Tech Lead & Senior Software Engineer | January 2018 – January 2020

- Led a team of 7 developers in creating cutting-edge applications featuring advanced image processing and face-detection algorithms, achieving a 20% increase in processing accuracy.
- Defined technical objectives, provided mentorship, preparing know how tutorials and training to new hires, virtual cross-teams, reducing onboarding dependency that boost team productivity.
- Conducted feasibility assessments and architectural reviews for regional projects with PM & PO.
- Directed end-to-end requirement analysis, project planning, and execution in collaboration with QA, PM, and development teams.

STC | Software Engineer , Tech Lead| August 2013 – December 2017

- Directed the integration of payment gateway APIs into on Android, KIOSK & Windows-Embedded devices to facilitate utility bill payments.
- Implemented a WhatsApp-inspired mass campaign and user referral model, resulting in a 15% increase in user engagement through new SEO-optimized web and mobile app.
- Oversaw the development of digital wallet, that facilitates seamless utility bill payments experience.
- Led incident management for production and staging environments, reducing issue resolution times.
- Delegated as IT Manager (In charge) to manage technical roadmaps, allocate budget and successfully delivered over 8 high-impact projects within budget and timeline constraints.

Programming Languages & Database

- C#, .NET Core, ASP.NET, JavaScript, Blazor, Xamarin, Java, nUnit, xUnit, WebApp & WebAPI
- Oracle, SQL Server, PostgreSQL, MySQL, SQLite, Redis, MongoDB, Cassandra, RabbitMQ

Cloud, DevOps & Monitoring Tools

- Azure (Azure Functions, Serverless, IaaS, PaaS, Containers), Kubernetes* (AKS), Docker, SharePoint
- CI/CD Pipelines, Azure DevOps, Jenkins, GitHub Actions, GitLab, Bitbucket, TeamCity, PowerShell
- Ansible ,K6, Grafana, Prometheus, ELK Stack, Splunk, Wix, JMeter, Sonar, JIRA & Confluence

Architecture & Software Development Practices

- Microservices, Distributed system, RESTful APIs, SOAP, MVVM, WPF, WCF, MVC, CQRS, Saga Pattern
- Event-Driven Architecture, Test-Driven Development (TDD), Behaviour-Driven Development
- Peer Code Reviews, Integration Testing, Unit Testing , documentation and demonstrations
- OWIN, OpenID Authentications, API Gateway, Agile, Scrum, Kanban, JIRA & Confluence
- Data Structures & Algorithms, System Design, Architectural Patterns

Education, Certifications & Personal Development

- Graduation in Computer Science
- Certified Android Developer
- GitHub Copilot (*Practice at work*)
- Microsoft Azure Cloud (*AZ-204, on-going*)
- IOT Associated Home automation (*Raspberry PI*)
- Python, C++, TypeScript (*Learn & Try Project)*

Interests & Hobby

- Skygazing & singletrack rides - MTB
- Automate home with Raspberry-PI, IoT & Alexa

Career Achievements

- Best Employee VOS award for outstanding contributions to business success, including driving training initiatives, exceptional onboarding process, and enhancing team productivity.
- Migrated a legacy system to a microservice architecture, achieving a 30% improvement in performance and scalability, that helped reduce cloud infrastructure cost & space, time.

Availability & Work Permit

- Quick join in 1 week
- No Visa support required - Open to job market *(NIEBIESKA KARTA UE; DOSTEP DO RYNKU PRACY*)

Best Regards

Jidhin Raju
